 - Strumming open strings with a single movement!

MAKING A DIFFERENCE TOGETHER

Our story begins when a family of a young girl with motor disabilities came to us with a very special request. They asked that we help make her dream, to share the stage with her friends and make music together, come true.

ARCANA was founded in 2015, by a team of musicians and engineers who joined forces to help support this young girl as well as millions of others around the world who confront similar difficulties.

Arcana's innovative musical instrument has been developed to meet the special needs of those with motor and cognitive disabilities, children, the elderly and other audiences.
